* and **

25X1 * [redacted] Comment. Detailed information on Soviet supply traffic within the Erfurt railroad district, which coincides with the region of the Erfurt Soviet transport headquarters, is obtained for the first time. The report shows that 443 carloads, i.e. a daily average of eight cars have been shipped during a period of about eight weeks. This volume of supply traffic is considered to be very low in view of the fact that a daily average of 43 carloads was handled in the slightly larger Dresden railroad district in December 1951, not counting 15 cars used by the fuel

25X1 [redacted] in Dresden. However, [redacted] 25X1

25X1 [redacted] only part of the entire supply traffic. Except for the fuel, ammunition, cement and uranium ore shipments, the [redacted] 25X1

25X1 [redacted] The

25X1 uranium ore shipment [redacted] on 29 January 1952 was

25X1 [redacted] crossing the border at Frankfurt/Oder.

25X1 ** [redacted] Comment. The following units were confirmed [redacted] 25X1

25X1 [redacted] in the report:
